

Frozen

Danni Nicholls and Ben Glover

I'm Frozen

Below the icy surface I see the bounty swim
I need to land it to feel alive again
If I take a hatchet to break on through the skin
I could fall into the monsters circling

I'm Frozen

Cast away the shadows that all around you fall
Let light slip through longing let fear begin to thaw
In the melted morning hear your own voice call
Come now there were never any monsters after all
Come now there were never any monsters after all

I'm Frozen

In the melted morning hear your own voice call
Come now there were never any monsters after all
